About Sharpcraft Knife

USA SUPPORT. PAKISTAN CRAFTSMANSHIP.

Sharpcraft Knife brings its customer conversations and knife making together across two locations: an office in the United States and manufacturing in Pakistan. Our collection combines varied blade profiles, handle treatments and distinctive finishes, presented here in a consistent branded photo catalog.

From coordinated kitchen sets and folding knives to axes and long-blade designs, each product reference is a starting point for a conversation. You can select an existing appearance or share reference photographs, preferred dimensions and quantity for a custom enquiry.

We believe a clear order begins with clear details. Confirm the exact materials, measurements, accessories, availability, price and lead time with our team before approving your order. Photographs show the visible design; they do not replace the final agreed specification.

USA office: 146 West St, Bloomsburg, PA 17815, USA

COLLECTION 01 / 10 DESIGNS

Chef Knife Sets

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

Bring the kitchen collection together with coordinated knife sets, photographed with their visible handle styles and storage arrangements. This section gathers multi-piece designs so you can compare the overall presentation before choosing a direction for your enquiry.

Start with the tasks you want the set to cover, then confirm the number of pieces and the dimensions of each knife. Ask which roll, sheath or other accessory is included. The photographs are a design reference; the final materials, finish and available options should be agreed in your quotation.

COLLECTION 02 / 10 DESIGNS

Kitchen Knives & Cutters

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

Explore individual kitchen blades, broad cleavers, ulu-style shapes and distinctive pizza cutters. Their different outlines make this a useful place to compare shape, handle positioning and the accessories shown in the product photographs.

Choose the design that matches your intended kitchen task and request the measurements needed to judge its scale. For curved cutters, confirm the edge length and cover arrangement. For larger blades, discuss blade height, overall length and grip dimensions. Ask for care instructions suited to the confirmed materials.

Enquiry notes: intended task / blade dimensions / grip / covers

COLLECTION 03 / 37 DESIGNS

Hunting & Fixed Blade Knives

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

This collection brings together Bowie-style profiles, compact fixed blades, tracker-inspired forms and skinner designs. Compare the overall silhouette first, then look at the handle contour, visible finish and sheath shown with the knife.

Your enquiry can identify a preferred reference and explain the size, quantity and handle appearance you want. Confirm the exact material specification, dimensions and accessories rather than relying on the photograph alone. If a sheath is required, ask for fit confirmation and additional views before approving the order.

Enquiry notes: overall size / handle preference / sheath / quantity

COLLECTION 04 / 19 DESIGNS

Damascus Knife Designs

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

Patterned finishes and varied handle combinations give these knife designs their visual character. This section groups the remaining Damascus-named profiles in one place, from curved forms to compact fixed blades, so their details can be compared without mixing them into other catalog sections.

Study the photographs for the visible pattern, blade outline and handle colour. Pattern appearance can vary between individual pieces. Confirm the actual steel composition, construction, dimensions and care requirements with the team. A product name or photograph alone does not establish a material grade or performance specification.

Enquiry notes: pattern appearance / profile / confirmed materials / care

COLLECTION 05 / 4 DESIGNS

Folding & Pocket Knives

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

Compact folding designs combine distinctive handle treatments with a blade that folds into the handle. The collection includes engraved metal-tone appearances and coloured handle styles, shown in their available product views.

Compare the shape and presentation, then request both open and closed dimensions. Confirm the opening and locking arrangement, exact materials, supplied pouch or sheath and any custom finish options. Additional close-up photographs can help you discuss details that are not visible in the catalog view.

Enquiry notes: open / closed dimensions / mechanism / accessories

COLLECTION 06 / 8 DESIGNS

Axes & Hatchets

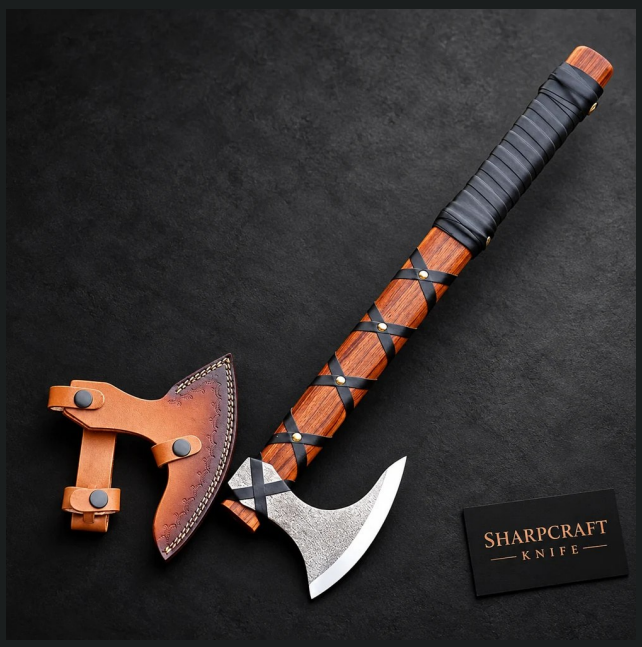

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

Engraved heads, bearded profiles and varied wood-handle treatments define this collection. Each photograph highlights the relationship between the head shape and handle, including decorative wrapping and visible carved details where present.

Begin by selecting a reference and describing your intended use or presentation requirements. Confirm head dimensions, overall length, weight, materials and any edge cover separately. Engraving, handle finish and accessory options should be discussed before approval; the catalog shows design appearance rather than a confirmed technical specification.

Enquiry notes: head size / handle length / engraving / edge cover

COLLECTION 07 / 11 DESIGNS

Daggers & Dirks

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

A focused selection of pointed profiles, decorative hilts and distinctive handle shapes. These designs range from carved-handle dirks to patterned dagger forms and sculpted metal-handle pieces. The gallery photographs help show differences in blade outline, guard and overall presentation.

Use the product reference to request the exact blade and overall measurements, handle material and included sheath. Where a photograph shows only one angle, ask for additional views before confirming the design. Discuss finish and custom presentation details directly with the team.

Enquiry notes: blade profile / guard / handle / sheath

COLLECTION 08 / 5 DESIGNS

Twisted Handle Knives

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

Twisted-handle forms create a continuous visual line from grip to blade. This section gathers spear-point, notched, tracker-inspired and cleaver-shaped designs with this distinctive handle treatment, allowing the different profiles to be compared together.

Look closely at the transition between blade and grip and request views from both sides if needed. Confirm overall dimensions, handle proportions, actual materials and the supplied sheath or cover. Explain the design changes you want in your enquiry so that the maker can confirm feasibility and the final quotation.

COLLECTION 09 / 34 DESIGNS

Swords & Long Blade Designs

Compare the details.

Blade profile / Handle shape / Visible finish / Included accessories

Long-blade silhouettes bring together medieval-inspired straight swords, curved scimitar and kopis forms, and decorative guard and pommel combinations. Browse this section by outline and hilt style, then open the linked product gallery to inspect the available views.

For an enquiry, specify the reference, intended presentation and delivery country. Request blade length, overall length, weight, materials and the details of any scabbard or sheath. Discuss the available finish, handle treatment and supply arrangements before confirming an order. Catalog photographs are visual references, not final dimensional drawings.
